

CodeChef Website Analysis

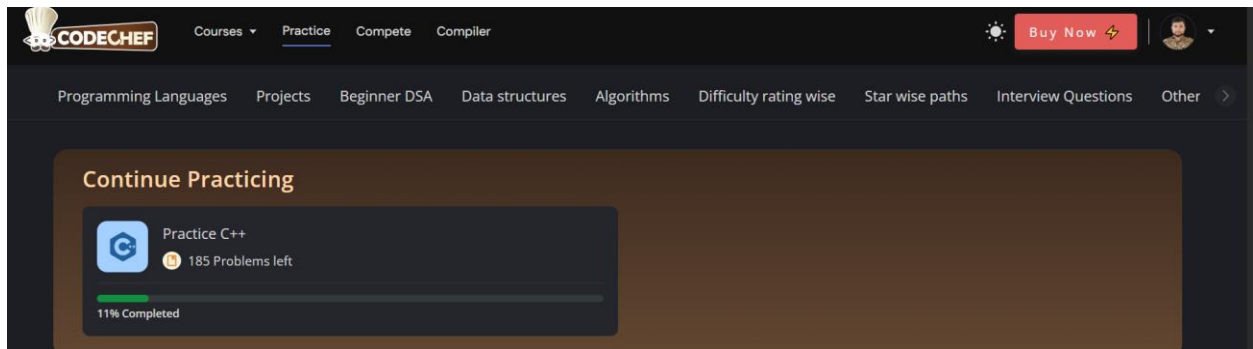

Overview:

CodeChef is contest-focused and learning-friendly, with a balance between competitive programming and beginner onboarding. It's particularly popular in India and Asia, with contests recognized for ratings & recruitment value.

UI/User panel

1. Homepage & Navigation

- Clean layout with navigation bar:
 - Contests
 - Problems (Practice, DSA learning series, Problem Sets)
 - Discuss (community forum)
 - Compete (live and upcoming contests)
 - Jobs/Recruitment challenges
- Emphasis on contests and learning resources right on the homepage.
- Personalized dashboard after login: shows rating, upcoming contests, and recent activity.

2. User Features

- **User Profile:**
 - Displays ratings, stars (beginner to 7-star coder).
 - Contest history with graph.
 - Submissions archive.

Learn Java	365.6k learners
Learn JavaScript	196k learners
Data Structures & Algorithms	80k learners
Competitive Programming	100.8k learners

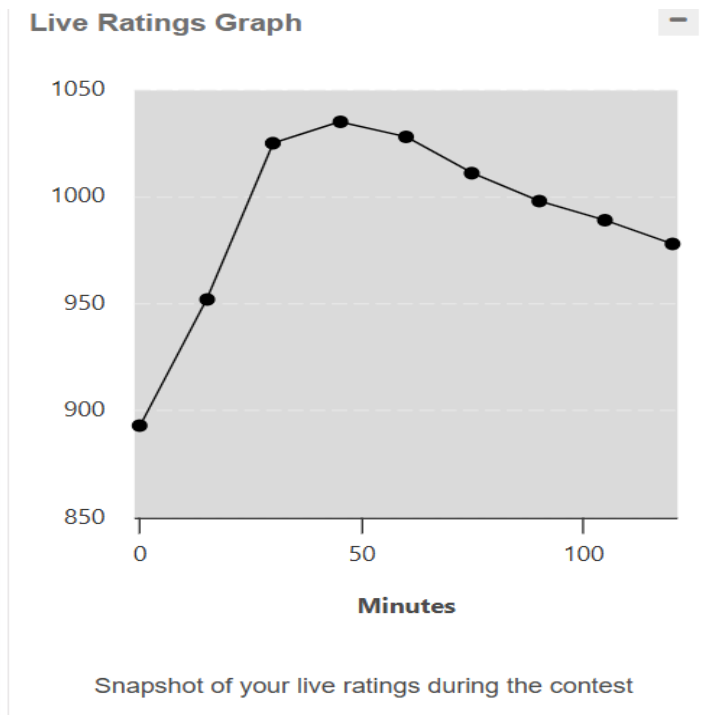

- Filter by company tags (for interview prep).
- Company base question

- **Contests:**
 - Monthly contests (Long Challenge, Cook-Off, Lunchtime).
 - External contests hosted by universities or companies.
 - Hiring contests for recruiters.
- **Discussion Forum (CodeChef Discuss):**
 - Community-driven problem discussions.
 - Contest editorials.
 - Tips & tricks for competitive programming.

3. Contest System

- Live leaderboards with rankings updated in real time.
- Ratings update after contests.
- Supports partial scoring (unlike LeetCode which is full binary scoring).
- Large user base → highly competitive (tens of thousands per contest).

4. Technical Features

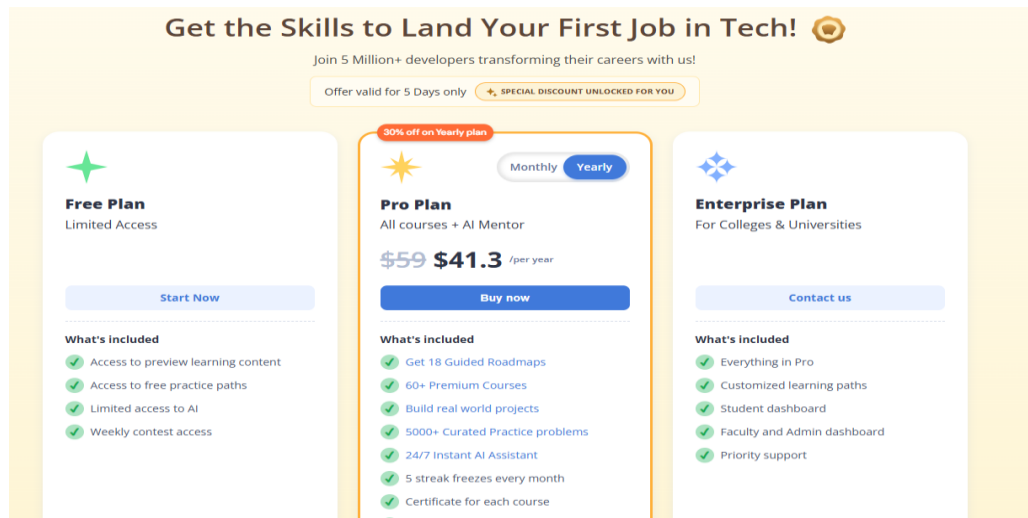

- Programming languages supported: C, C++, Java, Python, Go, Kotlin, Rust, etc.
- A compiler for practice different programming language

- Verdicts: AC, WA, TLE, MLE, RE, CE, Partial.
- Load balancing → critical during contests when submissions spike.

5. Monetization & Ecosystem

- Free practice & contests.
- **Paid programs:**
 - CodeChef Pro → additional problem sets & mock tests.
 - Hiring contests for companies (recruitment services).
 - Certification programs (DSA certification exam).

6. Strengths

Huge global community.

Beginner-friendly (learning tracks, star-based ranking).

Partial scoring system → encourages problem-solving attempts.

Integrated discussions & editorials.

Recognized by companies for hiring.

CodeChef Admin Panel

- **User Management** → handle accounts, bans, plagiarism.
- **Problem Management** → add/edit problems, test cases, difficulty, tags.
- **Contest Management** → schedule contests, assign problems, set scoring rules.
- **Analytics** → track participation, submissions, leaderboards.
- **Announcements** → publish updates, editorials, notifications.

CodeChef Judge Panel

- **Submission Intake** → accept code in many languages.
- **Compilation** → sandboxed environment, catch errors.
- **Execution** → run on sample + hidden + edge test cases.
- **Verdicts** → AC, WA, TLE, MLE, RE, CE, Partial Correct.
- **Scoring** → binary or partial, real-time leaderboard.
- **Security** → isolation, plagiarism detection, load balancing.
